

The first picture is the Litter Kwitter Station inside the Vermillion Home serving both Barnabas (pictured below) and Jezebel Vermillion.

The beginning step is to simply place your litter box next to your toilet, to help them get used to being near the toilet. When your Litter Kwitter arrives remove the litter box and replace with the Litter Kwitter in the same exact location.

Special piece of advice....once you have started using the Litter Kwitter instead of litter box DO NOT change the type of litter. I did....and it set me back two days. Jezebel let me know that was TOO MUCH change in her world for that week.

I left the Litter Kwitter next to the toilet in the floor for a couple of weeks, to ensure BOTH cats were comfortable. I didn't want to spark another rebellion. ;-)

This week I relocated the Litter Kwitter on to the toilet, and we have had three days of successful use.

Maintenance is minimal, I have increased how often I scoop their "box" (twice daily) only to ensure the cats are happy. Longtime cat owners understand cats MUST be happy to make any progress. If you let your cat box get too out-of-control your cat WILL NOT use it. Cats have standards! Since the Litter Kwitter has a small usage area and I'm training multiple cats I decided I would scoop twice a day.

Since starting this training we have used less cat litter. I can't wait till the day we can knock this expenditure off our monthly budget! Plus we won't have litter tracked all over the house. Walking around the house flushing toilets vs. vacuuming & scooping litter everyday.....Geez, let me think.

The next step is to replace the red ring with the orange-yellow ring. In this step they will still have litter, but the amount is decreased and there is an open area to the water below. Wish us luck!
